

Cable Handling Hooksticks

Product Data Sheet

Mine Cable Services Cable Handling Hooksticks are designed for use in the mining industry as a method of handling energized electrical cable supplying draglines, shovels, drills, and other minesite equipment. A lightweight design offered with a variety of hook styles, fiberglass insulated shaft lengths, and different handle options, allows you to create the Hookstick model that is most preferable for your application. Cable Handling Hooksticks are tested to 60kV DC and are suitable for use with cables ranging from 600V to 25kV.

Product Features and Benefits:

- Single hooks available in 3" or 4" diameter.
- Double reversing hook available in 3-1/2" wide or 4-1/2" wide.
- Double reversing flat hook for better handling of flat cable up to 2" wide where a round hook is not applicable.
- Handle options include standard molded D-handle or manufactured T-handle with grips for two handed operation.
- Fiberglass shafts available in 24", 36", or 48" length.
- Cable Hookstick storage bags available to protect Hookstick shaft from damage when not in use.
- Cable Hookstick cleaning wipes available to support product maintenance and safety inspection regime.
