

General Materials & Supplies for Vulcanized Cable Repairs

Mine Cable Services supplies all the necessary materials for completing vulcanized cable repairs. Available materials include silver soldering materials, cable preparation and cleaning supplies, bonding agents, mold releases, and replacement cable filler material. Cable repair materials can be supplied as individual items, bulk or prepackaged kits to best suit your warehousing and operational requirements.

Product Specifications and Ordering Information:

Picture:	Catalogue Number:	Product Description:	Application:
 <p>MCS CAT. NO. BC001 BONDING CEMENT Made in Canada *MSDS Sheets Available</p>	<p>BC001 Bonding Cement</p>	<p>1/2 pint can, 8oz</p>	<p>Used to promote bonding between the original cable jacket and the newly applied Neoprene/Hypalon jacket tape. *Dangerous Goods Regulated for Transport*</p>
 <p>MCS CAT. NO. BC002 BONDING CEMENT (Non-Hazardous Compound) Made in USA *MSDS Sheets Available</p>	<p>BC002 Water Based Bonding Cement</p>	<p>1/2 pint jar, 8oz</p>	<p>Used to promote bonding between the original cable jacket and the newly applied Neoprene/Hypalon jacket tape. *NOT regulated as dangerous goods* SPECIAL INSTRUCTIONS.</p>
 <p>LOCTITE 770 PRIMER/APPRÊT/PRIMER</p>	<p>LCT-770 Loctite Primer</p>	<p>1.75 oz (52 ml) glass bottle with plastic nozzle</p>	<p>Used to promote adhesion with the TPU50 products.</p>

Cable Repair Materials & Supplies

	<p>MR002-P Mold Release (International)</p>	<p>Water Based 8oz (1/2 pint), non-aerosol spray bottle</p>	<p>Apply to vulcanizing molds to assist in cable release after vulcanizing cycle. (*NOT Regulated DG)</p>
	<p>MR004-MK8 Mold Release (North America)</p>	<p>Silicone Base 8oz (1/2 pint) non-aerosol spray bottle</p>	<p>Apply to vulcanizing molds to assist in cable release after vulcanizing cycle.</p>
	<p>EFSS-02S Silver Solder</p>	<p>Sold in 0.5 kg units (1.1 pound)</p>	<p>Used for soldering of electrical conductor wires during cable repair.</p>
	<p>EFSP-02-HAR Silver Solder Paste</p>	<p>4oz Jar Brazing flux paste</p>	<p>Used with silver solder above when repairing electrical conductor wires during repair.</p>

Cable Repair Materials & Supplies

	<p>MCS-HP-35LF Electrical Cleaner</p>	<p>1 liter bottle (32 oz)</p>	<p>Used to clean outer cable, conductor insulation and remove any residual semi-conductive material. (*NOT Regulated DG.)</p>
	<p>MCS-PWHP-1 Citrus Based Solvent Wipes</p>	<p>1 citrus based solvent wipe 8" x 12" (20 cm x 30 cm)</p>	<p>Used to prepare the conductors before adding uncured insulation material. Clean conductor insulation and remove any residual semi-conductive materials.</p>
	<p>MCS-PWHP-2 Citrus Based Solvent Wipes, tandem pack</p>	<p>1 citrus based solvent wipe, 1 drying cloth 5" x 8" (13 cm x 20 cm)</p>	<p>Used to prepare the conductors before adding uncured insulation material. Clean and dry conductor insulation and remove any residual semi-conductive materials.</p>
	<p>CPK-01/3P Cable Preparations Kit</p>	<p>6 citrus based solvent wipes, 6 drying clothes and 3 12" sandpaper strips</p>	<p>Used to prepare the conductors before adding uncured insulation material (sand, clean, and dry conductor insulation and remove any residual semi-conductive material).</p>

Cable Repair Materials & Supplies

	FR-516/20 Filler Rope	5/16" dia. x 20' length	For cable size 1.5" to 2.8"
	FR-38/20 Filler Rope	3/8" dia. x 20' length	For cable size 3.0" and larger.
