

# Exothermic Connection Tool Starter Kits

To support operations who have selected Exothermic welding as their preferred method of conductor connection, MCS offers complete Exothermic Starter Tool Kit options to ensure each customer has all the necessary equipment and supplies to smoothly complete their cable repairs using this method. Items include special manufactured tools to ensure proper hold and placement of conductors within molds, mold preparation, cleaning, and temperature products. In addition, equipment includes electronic ignitor and power tools required to complete successful exothermic weld procedures.

**EWK-S/U**  
**Electronic Ignitor Accessory Kit**  
**for U-series cartridges**

**EWTK-001**  
**Shop Power Tool Kit**

Product Specifications and Ordering Information:	
Catalogue Number:	Description:
EWK-S/U Electronic Ignitor Accessory Kit	Shop supplies kit required for use with Exothermic Weld Molds and materials including electronic ignitor for use with U-series weld material cartridges.
EWTK-001 Shop Power Tool Kit	Shop power tool kit recommended for use with Exothermic weld mold conductor repair system to prepare and complete conductor joint procedure.
Refer to page 2 for individual replacement component ordering information	

# Exothermic Connection Tool Starter Kits, Individual Replacement Items

## Individual Replacement Components for Exothermic Connection Tool Starter Kits:

**EID-U**  
Electronic Ignitor.  
Does not include battery

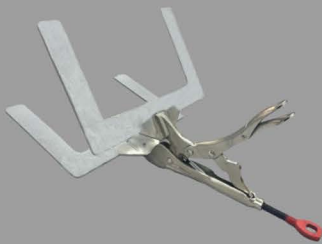

**Rechargeable Batteries & Rechargeable Battery Station**

**Right Angle Die Grinder, Mandril Set & Cut off Wheels**

**Band File & Sanding Belts**

**EWP-08**  
Exothermic Weld Plyers

**HHTH-02**  
Pre-Heating Torch

**EM-TG**  
Infrared Temperature Gun

**PFB-01/3**  
Conductor Protective Blanket.  
Set of 3

**EMS-STAND**  
Adjustable Stand to support  
mold at proper height

**WM-CCCB-01**  
Mold Cleaning Brush

**WMB-BR**  
Weld Mold Cleaning Brush

**WMB-LG**  
Weld Mold Cleaning Brush
