

Product Data Sheet

HR-24, Handi-Ramp Crossover Mat

MCS Handi-Ramps are designed to protect electrical cable from a variety of minesite traffic, for a portable, temporary cable crossing.

- Heavy Duty solid polyurethane construction allows for solid support for the vehicle and dependable protection for electrical cable crossing the roadway
- Rope handle is permanently molded into the completed Handi-Ramp and will not release while lifting or repositioning
- Operations are recommended to keep a pair of Handi-ramps in the back of all minesite rubber tire, light duty vehicles up to 1 ton for temporary placement over cables where a permanent crossing is not yet in place
- Newly redesigned to adjust the sloping sides and overall height
- Useful for prepared or unprepared roadway, typically used for service vehicles
- Intended for single person or two person handling
