

Skid Mounted Junction Boxes, 15kV or 25kV

An alternate connection system to electrical couplings, each 15kV or 25kV Skid Mounted Junction Box is CSA certified and features a Nema 4 rated enclosure manufactured on a heavy duty, towable skid framework. Custom manufactured to suit individual customer requirements, each 15kV or 25kV Skid Mounted Junction Box features roof mounted insulator and buss bar assemblies to accommodate Posiclamp to Posipin or terminal lug direct to buss bar connection. Available entrance options include strain relief, or split entrance plates as required by each operation. Standard features include electrical hotstick, roller arm microswitches for added operator safety, and rugged tow hooks for easy relocation on minesite operations. Each 15kV or 25kV Skid Mounted Junction Box design can accommodate single or double cable runs.
