## Cable Handling Hooksticks

**Cable Handling Hookstick with Single Hook**

**Cable Handling Hookstick with Double Reversing Hook**

Mine Cable Services Cable Handling Hooksticks are designed for use in the mining industry as a method of handling energized electrical cable supplying draglines, shovels, drills, and other minesite equipment. A lightweight design offered with a variety of hook styles, fiberglass insulated shaft at varying lengths, and handle options allows you to create the Hookstick model that is most preferable for your application. Cable Handling Hooksticks are tested to 60kV DC and are suitable for use with cables ranging from 600V to 25kV.

**Available product options:**

- Single hooks available in 3" or 4" diameter
- Double reversing hook available in 3-1/2" wide or 4-1/2" wide
- Double reversing flat hook for better handling of flat cable up to 2" wide where a round hook is not applicable
- Standard molded D-handle
- Manufactured T-handle with grips for two handed operation
- Fiberglass shafts available in 24", 36", or 48" length

### Additional Options:

**Shown Left:**

Manufactured T-Handle for two handed grip

**Shown Right:**

Standard D-handle Assembly
