

Product Data Sheet

Universal Cable Horse Stands

Universal Cable Horse Stands

In applications where more than one cable is required to be marked along the same run, Mine Cable Services has designed their line of Universal Cable Horse Stands. Available in either a double wide or a triple wide model, these cable horse stands are a sturdy alternative to “stacking” cables inside our Universal Cable Stands, which are designed for single cable runs. As with our Universal Cable Stands and Iron Horse Pipe Stands, standard available colours are orange and yellow, however, custom colours and company identification are available upon request.
